

## DETROIT URC BOARD MEMBERS

### **COMMUNITY HEALTH AND SOCIAL SERVICES (CHASS)**

Richard Bryce, Chief Medical Officer

### **DETROIT HISPANIC DEVELOPMENT CORPORATION**

Angela G. Reyes, Executive Director

### **DETROITERS WORKING FOR ENVIRONMENTAL JUSTICE**

Laprisha Daniels, Executive Director

### **DETROIT HEALTH DEPARTMENT**

Oluwaseun Akinyemi, Chief Epidemiologist

### **FRIENDS OF PARKSIDE**

Zachary Rowe, Executive Director

### **LATINO FAMILY SERVICES**

Lidia Reyes-Flores, Executive Director

### **NEIGHBORHOOD SERVICE ORGANIZATION**

Linda Little, President & CEO

### **EASTSIDE COMMUNITY NETWORK**

Donna Givens Davidson, President & CEO

### **INSTITUTE FOR POPULATION HEALTH**

Gwendolyn Daniels, Chief Operating Officer

### **HENRY FORD HEALTH**

Kimberlydawn Wisdom, Senior VP, Community Health & Equity and Chief Wellness & Diversity Officer

### **UNIVERSITY OF MICHIGAN SCHOOL OF PUBLIC HEALTH**

#### *HEALTH BEHAVIOR AND HEALTH EDUCATION*

Barbara Israel

Enrique W. Neblett, Jr.

Amy J. Schulz

#### *ENVIRONMENTAL HEALTH SCIENCES AND EPIDEMIOLOGY*

Marie O'Neill

#### *SCHOOL OF NURSING*

Jade Burns

#### *SCHOOL OF SOCIAL WORK*

Rogério Meireles Pinto

### **EMERITUS MEMBERS**

Sheilah Clay

J. Ricardo Guzman

Edie Kieffer

Richard Lichtenstein

## Detroit Urban Research Center (Detroit URC) Overview

The Detroit URC is an interdisciplinary, community-based participatory research (CBPR) partnership that equitably engages community-based organizations, health service institutions and academia to create research, programs and policies to improve health equity in Detroit.

For over 28 years, the Detroit URC and affiliated partnerships, building upon community resources and strengths, have enhanced understanding of the relationship between the social and physical environmental determinants of health, and translated the knowledge gained into public health interventions and policies that have resulted in improved health status and reduced health inequities.

CBPR projects have focused on a range of health issues and what contributes to them, including, asthma, heart disease, diabetes, air pollution, violence, access to health insurance, fresh food, and physical activity. The work of the Detroit URC and affiliated partnerships has made substantial contributions in a number of key areas, including: interdisciplinary and action-oriented research; diversity, equity and inclusion; prevention and alleviation of poverty; and community engagement and dissemination – all with a focus on, and in partnership with, community and health practice entities in Detroit.

## The Detroit URC aims to:

- **Foster and sustain collaborative research partnerships** between academic institutions and Detroit-based organizations focused on promoting health equity.
- **Enhance capacity of community, health practice and academic entities to engage as equitable partners in research** that meets the needs of the communities involved.
- **Strengthen the capacity of academic, community and health practice entities to engage in policy advocacy processes.**
- **Translate research findings to advance policy formulation, dissemination and education** at all levels of government and within organizations, agencies and systems.

# Detroit URC Programs & Resources

## The Community-Academic Research Network (CAR-Net)

The CAR-Net includes community-based organizations, health practice agencies and academic researchers interested in conducting and disseminating collaborative research in Detroit.

It facilitates information sharing and expands communications about research interests and opportunities through an online database. CAR-Net members have a profile on the Detroit URC

website. They also receive Information about potential partners, funding opportunities, research-related tools, and mentoring and technical assistance aimed at building capacity to conduct collaborative research.

## Collaborative Research Support

For the past 14 years, the Detroit URC has facilitated collaborative research through an annual Small Planning Grant funding program (approximately \$5,000 per grant). In collaboration with Poverty Solutions, the School of Social Work (SSW), the School for the Environment and Sustainability (SEAS), and the W. T. Grant Foundation, the Detroit URC administers the Small Planning Grant program to help foster new community-academic research partnerships and collaborative health research efforts in Detroit. As part of the program, the Detroit URC provides grant recipients with valuable capacity building support and mentoring. Over \$3.5 million dollars of additional funding has been acquired by small planning grant recipients.

## Capacity Building for Policy Advocacy

The Detroit URC provides training workshops, technical assistance, and ongoing support to adult and youth community groups to enhance the capacity of Detroit residents to conduct effective policy advocacy efforts. The Detroit URC trainings aim to build and support policy campaigns that address issues identified by the communities involved and establish linkages with and mobilize groups, organizations, community members and policy makers to work in partnership to achieve policy change. Issues that have been addressed through these policy efforts include: neighborhood blight, land use, academic achievement, and safety in and around schools.

## CBPR Capacity Building

The Detroit URC develops and conducts interactive CBPR workshops and an online training course aimed at building capacity within communities and institutions (e.g., academic, health departments, health systems, community-based organizations). The Center also provides technical assistance to new and emerging CBPR partnerships related to developing, maintaining, and sustaining partnerships. For more than ten years, university researchers and Detroit-based partners co-taught a week-long short course entitled, “Methods in Community- Based Participatory Research for Health” as part of the Summer Session in Epidemiology at the University of Michigan. The online course can be accessed through <https://www.mittrainingcenter.org/>. The course is offered for free or paid if you want to receive CE credit.

## Advancing Research In CBPR

As an extension of its CBPR capacity-building efforts, the Detroit URC has conducted a six-year study called *Measurement Approaches to Partnership Success (MAPS): An Innovative Tool for Assessing Long-Standing CBPR Partnerships*. Funded by the National Institute of Nursing Research (NINR) as part of its “Advancing Science, Improving Lives” Strategic Plan, the MAPS project has developed a clear definition of outcomes and success in long-standing CBPR partnerships, a specific set of factors that contribute to them, and a validated tool for measuring these factors. Others across the U.S. are able to use this tool and feedback guidelines to assess and strengthen their own partnership efforts to achieve health equity.

## CBPR Partnership Academy

The CBPR Partnership Academy is a year-long program designed to enhance participants’ knowledge and skills in CBPR, so they may apply this collaborative research approach to address racial and ethnic inequities in health in their communities.

Funded by the National Institutes of Health, the Academy includes: a week-long intensive course, taught in Ann Arbor in July by both U-M academic researchers and Detroit community partners;

one year of structured learning opportunities; and access to ongoing networking and mentorship.

Throughout the year, the newly formed partnerships work together to strengthen their partnerships and develop and implement a joint CBPR project focused on improving the health and well-being of the communities Involved.
